Chemical Lab Technician

Description

We are currently seeking a Chemical Lab Technician to join a team at a leading manufacturing facility. This is a rotating shift position that may include overtime and responsibilities across multiple locations. The successful candidate will play a critical role in maintaining quality and compliance within the laboratory setting.

Responsibilities

- Conduct chemical and physical testing using established methods.
- Assist with equipment calibration, maintenance, and troubleshooting.
- Maintain cleanliness of lab equipment and workspaces.
- Accurately record data on forms and within internal systems.
- Monitor quality records, control charts, and lab supply inventories.
- Ensure compliance with all safety, quality, and housekeeping standards.
- Participate in cross-training and other learning opportunities as needed.

Qualifications

- High school diploma or equivalent preferred.
- Experience in petrochemical labs highly desired.
- Strong multitasking skills in high-production environments.
- Proficiency in using lab applications and equipment.
- Strong math, observation, and communication skills.
- Proficiency in Microsoft Office (Word, Excel) is a plus.
- Ability to work overtime based on business needs.
- Physical ability to lift up to 50 pounds and stand for extended periods.
- Comfort with handling chemicals during testing processes.

Job Benefits

- Competitive salary and opportunities for career growth.
- Comprehensive benefits, including medical, dental, and 401k plans.
- A supportive, team-oriented workplace that fosters professional development.
